Technical Data Sheet

VT-20AH

Talc Powder

Product Overview: VT-20AH is a natural hydrated magnesium silicate mineral processed through fine grinding. Our company's talcum powder features high purity, stable quality, and excellent whiteness, making it indispensable in various industrial applications as a key raw material for numerous products.

Product Indicators

Item	Specification
Whiteness	>92
D50 (μm) Laser diffraction	20±3
D97 (μm) Laser diffraction	/
LoI	<6
Moisture (%)	≤0.5

Application area

Talc powder is widely used across industries due to its lubricity, absorbency, and stability. It serves as a reinforcing filler in plastics, rubber, and ceramics, and as a pigment in paper and paints. In cosmetics and personal care, it provides a silky texture and oil control. Pharmaceutical and food-grade talc is also used in tablets, food additives, and as a release agent.

Product Packaging and Storage

Packaging: The product is packaged in 25kg/bag kraft paper woven bags with inner plastic moisture-proof bags. Customized packaging solutions are available upon customer request.

Storage: Store in a dry, well-ventilated warehouse, avoiding moisture, rain, and direct sunlight to prevent product clumping and deterioration.

Address: Qingyishan Industrial Park, Kuandian Manzu Autonomous County, Dandong City, Liaoning Province
